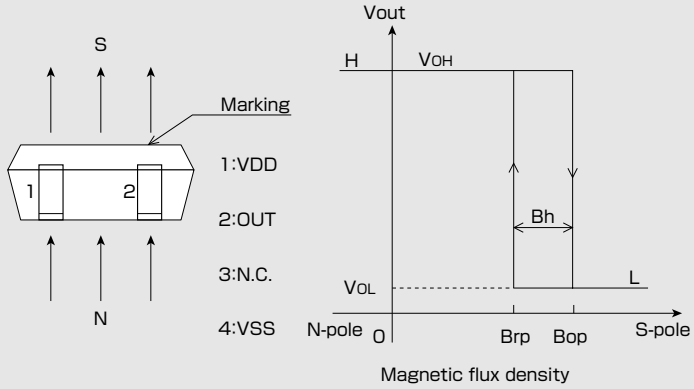
EM-1771

Shipped in packet-tape reel(5000pcs/Reel)

EM-1771 is ultra-small Hall effect ICs of a single silicon chip composed of Hall element and a signal processing IC.

Unipolar Hall Effect Switch	Supply Voltage 1.6~5.5V	Hall Element Pulse Excitation	High Sensitivity Bop:3mT	Output CMOS	SMT

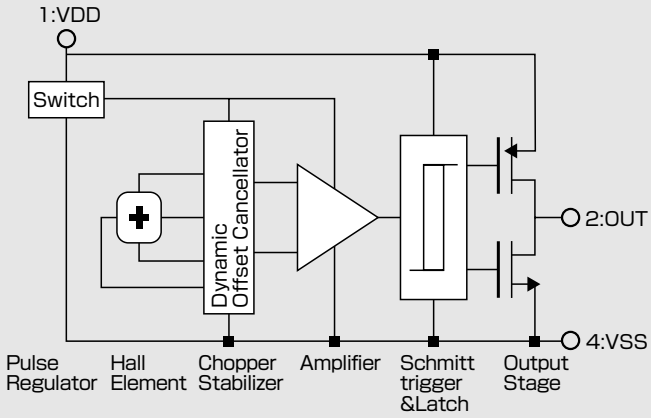
●Operational Characteristics



●Absolute Maximum Ratings (Ta=25℃)

Item	Symbol	Limit	Unit
Supply Voltage	VDD	−0.1 ~ 6.0	V
Output Current	I_{out}	±0.5	mA
Operating Temperature Range	Topr	−30 ~ 85	℃
Storage Temperature Range	Tstg	−40 ~ 125	℃

●Functional Block Diagram



●Magnetic ① and Electrical Characteristics (Ta=25℃ VDD=1.85V)

Item	Symbol	Conditions	Min.	Typ.	Max.	Unit
Supply Voltage	VDD		1.6		5.5	V
Operating Point	B_{op}		1.4*	3.0	4.0	mT
Release Point	B_{rp}		1.1	2.2	3.7*	mT
Hysteresis	B_h		0.3*	0.8	1.5*	mT
Period	T_p			50	100	ms
Output High Voltage	VOH	Io=−0.5mA	VDD −0.4			V
Output Low Voltage	VOL	Io=+0.5mA			0.4	V
Supply Current	IDD	Average		4	9	μA

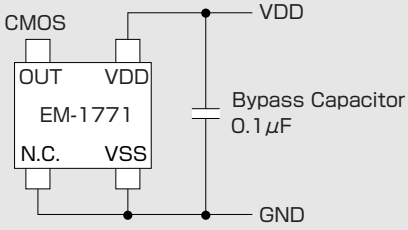
The characteristics with 「*」 marks are design targets. 1 [mT] =10 [Gauss]

●Magnetic Characteristics ② (Ta=−30℃~85℃ VDD=1.85V)

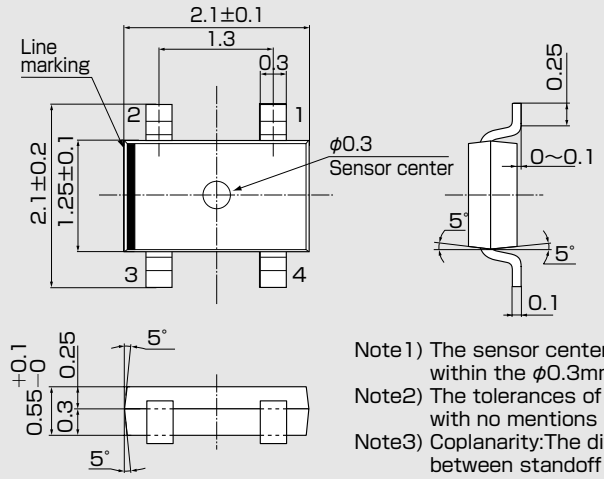
Item	Symbol	Conditions	Min.	Typ.	Max.	Unit
Operating Point	B_{op}		1.2	3.0	4.4	mT
Release Point	B_{rp}		0.9	2.2	4.1	mT
Hysteresis	B_h		0.1	0.8	1.7	mT

Note) The above specifications are design targets.

●Application Circuit



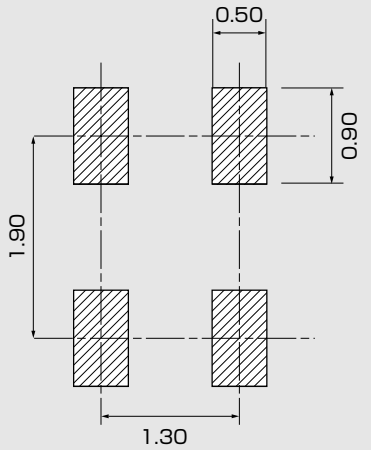
●Package (Unit:mm)



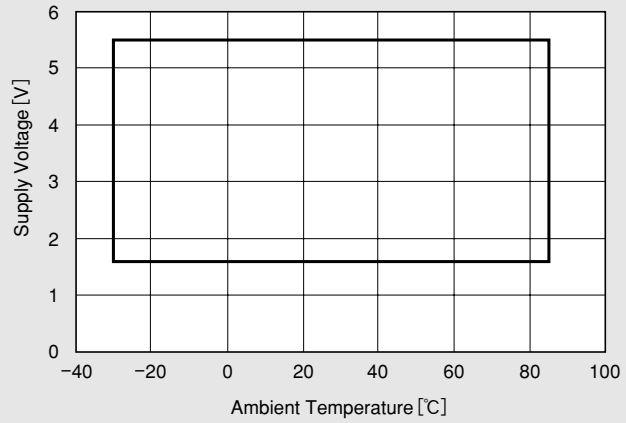
Pin No.	Pin Name	Function	Comment
1	VDD	Supply Voltage	
2	OUT	Output Voltage	
3	N.C.	–	Short to GND
4	VSS	GND	

Note1) The sensor centeris located within the φ0.3mm circle.
Note2) The tolerances of dimensions with no mentions is ±0.1mm.
Note3) Coplanarity:The differnces between standoff of terminals are max.0.1mm.
Note4) The sensor part is located 0.4mm(typ.) far from marking surface.

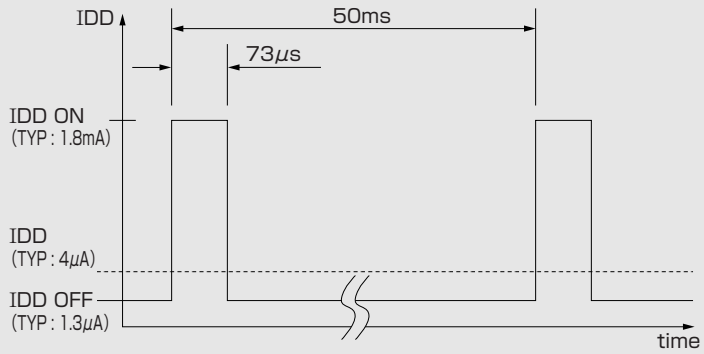
●(For reference only)Land Pattern (Unit:mm)



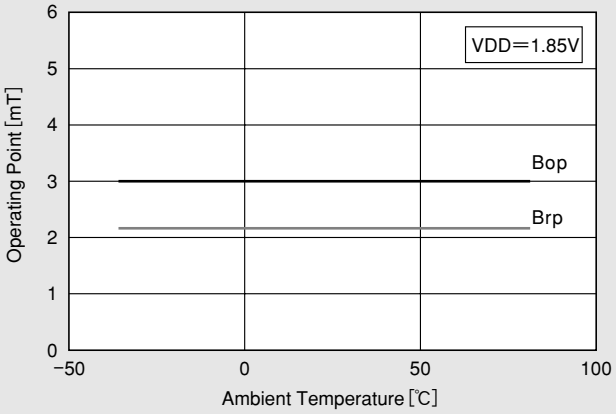
●Supply Voltage



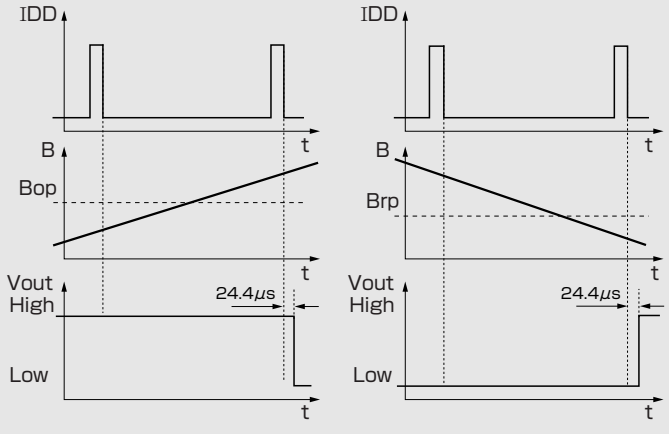
●IDD Pulse Driving (VDD=1.85V)



●Temparature Dependence of Bop. Brp



●Function Timing Chart



Operating Point Timing　　Release Point Timing

This Hall IC's output is held as internal data just before the internal circuit turns OFF (IDD OFF). And after 24.4 μs, the output changes.
Note) 24.4 μs in figures is typical value

IMPORTANT NOTICE

- These products and their specifications are subject to change without notice. When you consider any use or application of these products, please make inquiries the sales office of Asahi Kasei Microdevices Corporation (AKM) or authorized distributors as to current status of the products.

- Descriptions of external circuits, application circuits, software and other related information contained in this document are provided only to illustrate the operation and application examples of the semiconductor products. You are fully responsible for the incorporation of these external circuits, application circuits, software and other related information in the design of your equipments. AKM assumes no responsibility for any losses incurred by you or third parties arising from the use of these information herein. AKM assumes no liability for infringement of any patent, intellectual property, or other rights in the application or use of such information contained herein.

- Any export of these products, or devices or systems containing them, may require an export license or other official approval under the law and regulations of the country of export pertaining to customs and tariffs, currency exchange, or strategic materials.

- AKM products are neither intended nor authorized for use as critical components$_{Note1)}$ in any safety, life support, or other hazard related device or system$_{Note2)}$, and AKM assumes no responsibility for such use, except for the use approved with the express written consent by Representative Director of AKM. As used here:
  Note1) A critical component is one whose failure to function or perform may reasonably be expected to result, whether directly or indirectly, in the loss of the safety or effectiveness of the device or system containing it, and which must therefore meet very high standards of performance and reliability.
  Note2) A hazard related device or system is one designed or intended for life support or maintenance of safety or for applications in medicine, aerospace, nuclear energy, or other fields, in which its failure to function or perform may reasonably be expected to result in loss of life or in significant injury or damage to person or property.

- It is the responsibility of the buyer or distributor of AKM products, who distributes, disposes of, or otherwise places the product with a third party, to notify such third party in advance of the above content and conditions, and the buyer or distributor agrees to assume any and all responsibility and liability for and hold AKM harmless from any and all claims arising from the use of said product in the absence of such notification.
