

Molex's range of pre-crimped leads offers a simple and cost-effective solution for any pre-production and prototype requirements. Available for the most popular Molex connector families, the leads are offered in female-to-female and male-to-male configurations and lengths of 150mm and 300mm

### Features and Benefits

Pre-crimped and fully tested cables	Decrease time to market
Available in 150mm and 300mm lengths	Ideal for all prototype and pre-production requirements
Leads crimped on both ends	Suitable for wire-to-wire applications and when cut in half wire-to-board applications
UL listed cables	Assures high-quality approved materials
Available for most popular Molex families	Helps customers choose the right connector before investing in application tooling
